

Assembly Guide for THE GRYPHON PENDRAGON Reference Speaker System - Bas tower

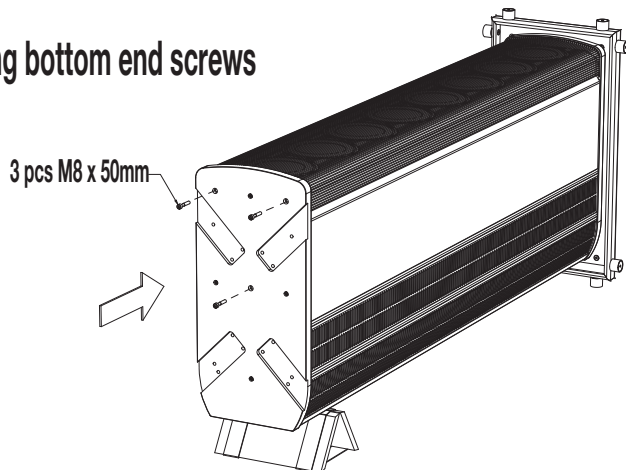

CAUTION! The Poseidon towers are a very heavy and should only be moved by 3-4 people to avoid damage or injury. When the speaker is upright, it can be turned and placed approximately at the intended position.

Place a piece of carpet under the bottom rear part of the tower in order not to damage the rear part of the bottom plate while raising the tower.
- unless you have a carpet on the floor already.

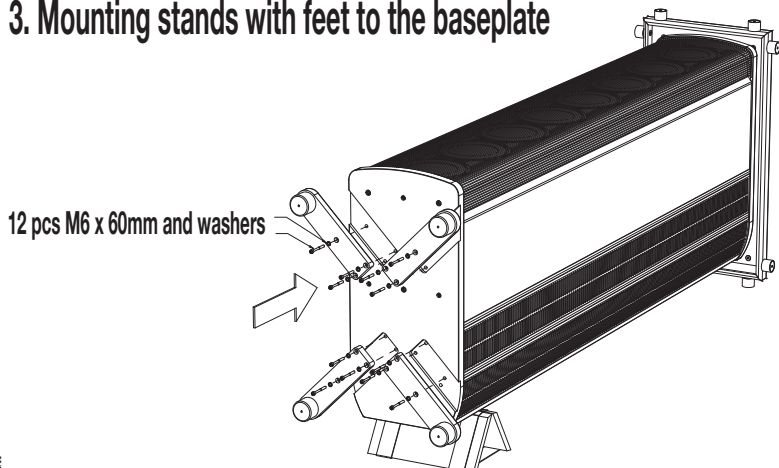

1. Unmounting bottom end transport panel

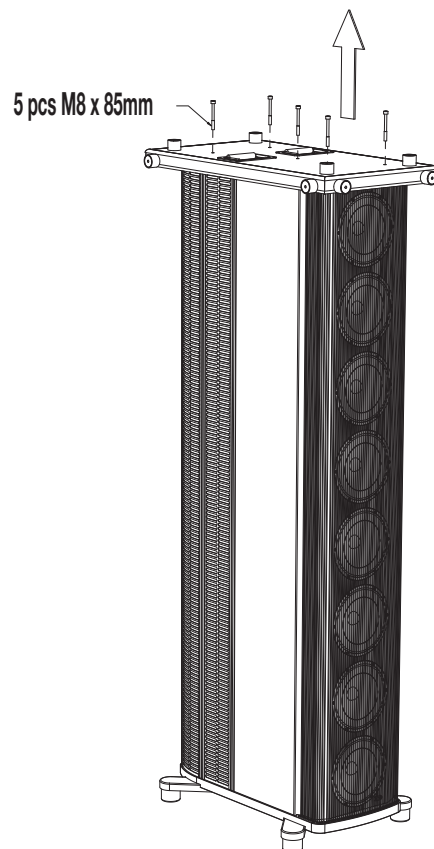

2. Mounting bottom end screws

3. Mounting stands with feet to the baseplate

4. Unmounting top end transport panel

5. Mounting top end screws
