Gryphon Colosseum

Stereo Amplifier

In the aftermath of our milestone 25th anniversary, Gryphon Audio Designs can look back with pride on more than a quarter of a century spent re-defining the state of the art in music listening for the domestic environment.

As the introduction of the breakthrough Colosseum Stereo Power Amplifier makes abundantly clear. Gryphon continues to define and refine the future foundation for all Gryphon products to come and of cutting edge home audio, selectively and critically incorporating emerging that unbridled curiosity and ambition to reveal technological advances in the service of your listening pleasure.

Like every Gryphon product from the very beginning, the Gryphon Colosseum is designed by Gryphon founder, Flemming E. Rasmussen, and hind all our efforts to this very day. manufactured in Denmark under his creative guidance.

Every Gryphon component reflects his training and experience as an sparked by the seemingly arrogant artist and industrial designer, as his acclaimed aesthetic sensibilities imbues notion that Gryphon should not them with uniquely original form and functionality.

At Gryphon, form follows function as innovative engineering gives rise instead offer them what they to the perfect fusion of sublime musicality and daring, imaginative design for truly need, but just didn't enhanced pride of ownership even during those rare moments when your know it yet. Fortunately, a Gryphon system stands silent.

Gryphon makes a new level of innovative design and musical insight lovers and dedicated auavailable to the fortunate few with the Colosseum Stereo Power Amplifier, the diophiles saw the value latest chapter in the adventure that is the Gryphon's tale.

Curiosity and Ambition

Fittingly, the Gryphon's tale is not the typical story of how a company created admission that makes a product. Instead, it is the story of how a product created a company a Gryphon the exclusive quarter of a century ago, as Gryphon's founder and a close-knit circle of reserve of a small circle talented friends created a product for their own use out of sheer unadulter- of discerning individuated curiosity to see just how far performance could be taken if mundane als who insist on ownconcerns such as cost and conventional thinking were excluded from the ing the very best. creative process.

The result was a product (the now legendary Gryphon Head Amp) so Gryphon is likely to re-

far beyond the current state of the art in both technology and concept that it remains a much sought after cult component that even now can hold its own in performance and serves as a milestone reference for many audiophiles.

This "take no prisoners" approach would lay the even more of the essence of every musical performance remain the driving force be-

Tower of Power

The Gryphon Colosseum was designed to partner the Mirage preamplifier, the radical design experiment that laid the cornerstone for an esoteric third tier of Gryphon components. Representing the fruit of an extraordinary comprehensive development project, the Colosseum Stereo Power Amplifer will enhance any home audio system.

main a brand name that For ultimate convenience, the Colosseum can be configured to turn on automatically when the preamplifier turns on and to power down following a period with no signal. A software-based user interface permits easy, intuitive access to practical user-controlled features.

> Gryphon Audio Designs remains committed to discrete circuitry and 100% Class A bias in the Gryphon Colosseum power amplifier, weighing in

> While the Colosseum takes Gryphon's distinctive styling one step further, our ongoing commitment to uncompromising sound quality is reaffirmed by a wealth of details such as 2 x 160 Watts Pure Class A output power, 48 High-current bipolar output transistors, a 340,000 microFarad power capacitor bank and flat frequency response extending beyond 350 kHz.

> The strict dual mono amplifier is suspended between the curved. de-coupled side panels in a unique configuration that provides optimal layout and operating conditions for all components. The dual transformers are isolated and effectively shielded to prevent unwanted interaction with other

> Unique mechanical design ensures optimal thermal tracking between drivers and output devices. The separate driver section has its own power supply from individual windings on the custom-built toroidal transformers and features its own generous bank of proprietary Gryphon capacitors. The output section employs Sanken bipolar output devices for extreme reliability in addition to outstanding sonic performance. These transistors deliver momentary peak power of 4,000 Watts per channel without overload. Each of the 48 transistors is bypassed with individual film capacitors.

In the best Gryphon tradition, the Colosseum utilizes a completely independent transformer and power supply for display and control circuits, creating an effective firewall that prevents digital noise generated by these circuits from reaching the amplifier circuits.

Negative feedback is not used and DC coupling is achieved with DC servo circuitry. Internal wiring in the signal path is kept to an absolute

minimum. The finest Gryphon Guideline Reference silver cable is used throughout.

The Gryphon Colosseum is fitted with balanced inputs exclusively. Elimpersonal style and interior decor. inating phono sockets in the signal path ensures the integrity of the sensitive

lugs and banana connectors for a tight, reliable connection.

Pure Class A and Green Bias

True Class A operation has always been a Gryphon benchmark, because An Aspirational Ideal there is no substitute for the sheer musical magic of pure Class A. The A new component from Gryphon Audio Designs is always a noteworthy is no turning back.

For situations where full Class A operation is not required, the Gryphon Colosseum incorporates proprietary Green Bias circuitry, which automatical-spire the competition as well as makers of conventional street legal vehicles ly adjusts bias level to match the selected volume setting when paired with for years to come, each Gryphon component takes audio technology and a Gryphon preamplifier via Gryphon's proprietary Green Bias Link. Tracking the understanding of music reproduction to new heights that serve as inbias in this way significantly reduces power consumption and heat generat-spiration for others and have made Gryphon Audio Designs a force to be ed by the amplifier without compromising Class A audio performance.

For use with a preamplifier without Green Bias, the Gryphon Colosseum also features threestep manual bias adjustment.

Your Design Statement

The slim, majestic oval-shaped high rise tower of the Gryphon Colosseum occupies minimal floor space. With end plates machined from solid blocks of 40 mm black polyvinylmethacrylate and smart, curved side panels of your choice, the Colosseum is a strikingly handsome minimalist sculpture that will enhance any space.

Uniquely, the design of your personal Gryphon Colosseum power amplifier is entirely up to the experience, in the ways that only great art you. Thanks to the modular construction of the can reward." sleekly curved side panels, your Gryphon dealer can remove and replace them easily, for custom styling options limited solely by the owner's imagi-

Whenever you re-decorate or move, you can have your Gryphon Colosseum re-dressed and updated to always keep pace with your evolving

This exclusive service and extraordinary level of flexibility was pioneered by Gryphon for our Atlantis, Trident and Poseidon loudspeaker systems and The custom-built Gryphon speaker terminals accept bare wire, spade remains unique in home audio. It is our philosophy that the Gryphon owner deserves not only sound quality to the highest audiophile standards, but also a personalised design statement equally pleasing to the eye.

Features and Specifications

Gryphon Colosseum Stereo

- Pure Dual Mono configuration
- Pure Class A 2 x 160 Watts (8 Ohm)
- Zero global negative feedback
- 48 high current bipolar output transistors
- 340,000 µF capacitor bank
- Balanced circuit
- DC servo-coupling
- · Gryphon Guideline silver internal wiring
- Decoupled Printed Circuit Boards and transformer castings
- Military spec. double-sided printed circuit boards
- Two separate Holmgren toroidal transformers with internal magnetic shielding
- · Separate power supplies for digital and analogue circuits
- Gold-plated Neutric XLR input sockets
- Gold-plated custom-built binding posts
- Vacuum Fluorescent Display
- Adjustable display brightness
- Selectable automatic Green Bias setting or manual Low/Mid/High bias
- Firmware upgrades via PC
- · Non-invasive protection system
- · Designed and built in Denmark
