## Wiring of RCA -> LEMO cables - <u>NOT recommended as permanent solution</u> Optimal connection and balancing is possible if avoiding the RCA plugs.

## **IMPORTANT** regarding wiring on the tonearm:

The ÷Left and ÷Right signal (on the RCA shields)

## must NOT:

- be connected to each other!
- or connected to turntable- or tonearm chassis/ground

Please verify above for each tonearm / turntable that you want to demonstrate with the Legato.
